

# Theses

The following theses were submitted by students in laboratories that joined the Cambridge Research Institute in 2007.

## Pedro Correa de Sampaio

### MSc thesis

Characterisation of an *in vitro* 3D multicellular model of the tumour micro-environment (Murphy laboratory, 2007).  
University of Lisbon

## Kumar Rohit Lal

### Clinical fellow PhD thesis

Pro-tumourigenic role of suprabasal mitogen activated protein kinase in murine epidermis (Watt laboratory 2007).  
University of London

## Owen McGinn

### PhD thesis

The role of ADAM28 in lymphocyte biology (Murphy laboratory, 2007). University of Cambridge

## Gareth Wayne

### PhD thesis

The application of fluorescence technology to the characterisation of novel proteases (Murphy laboratory, 2007). University of East Anglia.
